PROFILE SUMMARY

I am a college student in Institut Teknologi Indonesia who is currently tutoring Python fundamental as an assistant laboratory. Driven to explore new knowledge, at present I'm diving deep into Machine Learning and developing my interest into the Startup field. If I had the chance to do analytical thinking about one unique problem and able to build solution to solve the problem, I would love to involved myself in. Because through that, I believe I will find something new that will be applicable in the future
